

Area of a circle

ROK – Retention of Knowledge

Identify the radius and diameter for each of the circles.

Hurricane Katrina happened in 2005 and mixed up all the words. Can you unscramble the words.

Unscrambled words:

- eraa → area
- retaidem → diameter
- pitulumly → multiply
- cerenfuricemuc → circumference

Literacy

To find the area of a circle

use the formula $Area = \pi r^2$

Pi is the number of times the diameter fits into the circumference of a circle. Use pi as

$$\pi = 3.14 \dots \dots$$

Example: Radius = 8cm

Diameter = 16cm

$$Area = \pi r^2$$

$$Area = 3.14 \times radius \times radius$$

$$Area = 3.14 \times 8 \times 8$$

$$Area = 200.96cm^2$$

Memory

Skill 1 Find the area of these circles
