

# Functional Skills

## Recipes/Scaling

Find out how many ingredients you need for one person.

## Tackling functional problems

- Break the task up into smaller manageable steps.

Chunk the challenge

Presentation

- Display your answer in a logical order. Use headings to help keep track of your calculations.

- Remember, functional questions often link multiple maths skills together. Make a list of the skills you think you may need. Use this list as a checklist when you reach a dead end.

Links

## Money

Write monetary amounts as you would expect to see them displayed in a shop or online.

100 pence in one pound  
 $100p = £1$
