## Tables and Charts

Jane recorded the information of the colour of each of the students hair colour in her class.

| Brown | Blonde | Brown | Brown | Blonde | Blonde | Brown | Red | Blonde | Black |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Black | Brown | Blonde | Black | Brown | Red | Brown | Black | Brown | Blonde |

1. Complete the frequency table for the above information.

| Hair Colour | Tally | Frequency |
| :--- | :--- | :--- |
| Blonde |  |  |
| Brown |  |  |
| Black |  |  |
| Red |  |  |

2. Represent the information in the table as a bar chart.

3. What is the mode colour of hair?
4. The graph shows the amount of lollipops sold during one week.
a) Which two days sold the same amount of ice lollies?
b) What is the difference between Monday's and Friday's sales?
c) Explain what might have happened on Tuesday.

The chart records the amount of hours Joanna and Tanya watch TV at the weekend.

5. Write down the number of hours of TV Joanna watched on Friday.
6. On which day did Joanna and Tanya watch the same amount of hours of TV?
7. Who watched the greatest number of TV hours over the weekend? Show all working out.

The bar chart shows the average midday temperature of each month from January to December.
8. Complete the chart for August $24^{\circ} \mathrm{C}$
December $10^{\circ} \mathrm{C}$
9. Calculate the range of temperatures in the bar chart.

| Skill | Questions | Score | Available <br> Marks |
| :--- | :--- | :---: | :---: |
| Complete a tally and frequency table | 1 |  | $\mathbf{2}$ |
| Draw and interpret bar charts. | $2,3,8,9$ |  | $\mathbf{7}$ |
| Draw and interpret dual bar charts. | $5,6,7$ |  | $\mathbf{5}$ |
| Interpret other types of chart | $4 a, 4 b, 4 c$ |  | $\mathbf{3}$ |
|  | Total Marks |  | $\mathbf{1 7}$ |

## Answers Tables and Charts

Jane recorded the information of the colour of each of the students hair colour in her class.
Brown Blonde Brown Brown Blonde Blonde Brown Red Blonde Black Black Brown Blonde Black Brown Red Brown Black Brown Blonde

1. Complete the frequency table for the above information.

| Hair Colour | Tally | Frequency |
| :--- | :--- | :---: |
| Blonde | HHI I | 6 |
| Brown | HH III | 8 |
| Black | IIII | 4 |
| Red | II | 2 |

2. Represent the information in the table as a bar chart.

Hair Colour
Brown
3. What is the mode colour of hair?
4. The graph shows the amount of lollipops sold during one week.
a) Which two days sold the same amount of ice lollies?
Monday and Thursday
b) What is the difference between Monday's and Friday's sales?
/1 $200-150=50$
c) Explain what might have happened on Tuesday.
Temperature Fallen Rained/Snowed

## Answers

The chart records the amount of hours Joanna and Tanya watch TV at the weekend.

5. Write down the number of hours of TV Joanna watched on Friday. 3 hours
6. On which day did Joanna and Tanya watch the same amount of hours of TV? Saturday
7. Who watched the greatest number of TV hours over the weekend? Show all working out.

Joanna: $3+7+7=17$ hours
Tanya: 6+8+2=16 hours

Joanna watch the most TV
over the weekend by 1 hour.
The bar chart shows the average midday temperature of each month from January to December.
8. Complete the chart for August $24^{\circ} \mathrm{C}$
December $10^{\circ} \mathrm{C}$
9. Calculate the range of temperatures in the bar chart.

$$
24-6=18
$$
