## Histograms

The table gives some information about the height, in cm , of 50 students.

| Height (h cm) | Frequency | Frequency <br> Density |
| :---: | :---: | :---: |
| $60<h \leq 70$ | 12 |  |
| $70<h \leq 80$ | 24 |  |
| $80<h \leq 100$ | 28 |  |
| $100<h \leq 130$ | 36 |  |

1. Complete the table by calculating the frequency density.
2. On the grid, draw a histogram for the information above.

3. Work out an estimate for the number of people taller than 110 cm .
4. Complete the table and graph for the size of people's feet, in cm .

| Foot size(s cm) | Frequency | Frequency <br> Density |  |
| :--- | :---: | :---: | :---: |
| a) | $5<s \leq 10$ | 7 |  |
| b) |  |  | 0.6 |
| b) |  |  | 1.6 |
| a) | $25<s \leq 30$ | 1 |  |
|  |  |  |  |

a) Calculate FD $/ 1$
b) Calculate Freq $/ 2$
c) Complete Graph /1

The histogram shows the speed, in mph , of 81 cars.

5. Estimate the proportion of cars that travel between 100 mph and 120 mph .
6. How many cars have a top speed less than 100 mph ?
7. Calculate what the median top speed of the cars is.

| Skill | Questions | Score | Available <br> Marks |
| :--- | :--- | :---: | :---: |
| Calculate the frequency density | $1,4 a$ |  | $\mathbf{2}$ |
| Calculate the frequency from a histogram | $4 b$ |  | $\mathbf{2}$ |
| Accurately draw a histogram | $2,4 \mathrm{c}$ |  | $\mathbf{3}$ |
| Interpret a histogram. | $3,5,6,7$ |  | $\mathbf{1 0}$ |
|  | Total Marks |  | $\mathbf{1 7}$ |

The table gives some information about the height, in cm , of 50 students.

| Height (h cm) | Frequency | Frequency <br> Density |
| :---: | :---: | :---: |
| $60<h \leq 70$ | 12 | 1.2 |
| $70<h \leq 80$ | 24 | 2.4 |
| $80<h \leq 100$ | 28 | 1.4 |
| $100<h \leq 130$ | 36 | 1.2 |

1. Complete the table by calculating the frequency density.
2. On the grid, draw a histogram for the information above.

Height of Students (cm)
3. Work out an estimate for the number of people taller than 110 cm .

$$
\frac{20}{30} \times 36=24 \text { people }
$$

4. Complete the table and graph for the size of people's feet, in cm .

$\left.\begin{array}{|c|c|c|}\hline \text { Foot size(s cm) } & \text { Frequency } & \begin{array}{c}\text { Frequency } \\ \text { Density }\end{array} \\ \hline \text { a) } & 5<s \leq 10 & 7 \\ \text { b) } & 10<s \leq 20 & 6 \\ \hline \text { b) } & 20<s \leq 25 & 8 \\ \hline \text { a) } & 25<s \leq 30 & 1\end{array}\right]$
a) Calculate FD /1
b) Calculate Freq $\quad / 2$
c) Complete Graph /1

## Answers

The histogram shows the speed, in mph , of 81 cars.

5. Estimate the proportion of cars that travel between 100 mph and 120 mph .

$$
\frac{10}{20} \text { of } 18=9 \quad 9+23=32 \quad \text { Proportion }=\frac{32}{81}
$$

6. How many cars have a top speed less than 100 mph ?
10
$\frac{10}{20}$ of $18=9$
$9+34=43$
43 cars
7. Calculate what the median top speed of the cars is.

81 cars Median car $=\frac{81+1}{2}=41$ st car
Is in the $90<s \leq 110$ band $(34+18=52) 7$ cars left to go to get to 41 after the 34 cars in the first group.
$\frac{7}{18}$ of 20 is $7.8 \mathrm{mph}(1 \mathrm{dp}) \quad$ So the median is $90+7.8=\mathbf{9 7 . 8} \mathbf{~ m p h}$
